

**Thanks for not wearing
fragrance!**

A lot of people get headaches, asthma, sore eyes and sinus problems from fragrance and perfume – including other people’s. Smelling someone else’s perfume can make them unwell for hours.

Fragrance isn’t made of flowers any more but chemicals - e.g. dioxane and acetaldehyde - that cause headaches and allergies as well as long-term problems like cancer and hormone problems. Bad for you, bad for the people round you.
